

DIPARNA ADHIKARY

East Lansing, MI | (517) 303-8007 | d.adhikary123@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Master's candidate in Data Science (GPA 3.9, graduating May 2026) with 5+ years of experience building BI and analytics solutions across workforce, compliance, and operations domains. Designed and deployed 50+ Power BI and Tableau dashboards serving 200+ stakeholders at Deloitte; automated reporting pipelines using Python, R, and SQL to reduce manual effort and strengthen data governance. Experienced in ETL workflow design, feature engineering, statistical modeling, and cross-functional stakeholder alignment. Skilled at turning complex data requirements into clear, decision-ready analysis for senior leadership.

TECHNICAL SKILLS

Business Intelligence: Power BI (DAX, Data Modeling, Power BI Service), Tableau, Looker, Streamlit
Programming and Data Analysis: Python (Scikit-learn, PyTorch, TensorFlow), R, SQL (T-SQL, MySQL), Java
Cloud and Data Platforms: Google Cloud Platform, Snowflake, Azure
Machine Learning and Analytics: Predictive Modeling, Feature Engineering, Time Series Forecasting, Reinforcement Learning, Statistical Analysis
Automation and Version Control: Power Automate, Power Apps, GitHub
Data Governance and Compliance: ETL Pipeline Design, Data Quality Control, Audit-Ready Documentation, Regulatory Reporting

PROFESSIONAL EXPERIENCE

Michigan State University, East Lansing, MI

Graduate Assistant, Workforce Analytics - Office for Institutional Diversity and Inclusion (IDI) October 2024 - May 2026

- Strengthened federal hiring compliance reporting accuracy by 30% by engineering repeatable ETL workflows in Python, R, and SQL that consolidated disparate HR data sources into a single governed data model, eliminating manual reconciliation gaps across applicant flow datasets.
- Accelerated leadership decision-making on recruitment and retention strategy by developing workforce analytics dashboards that translated complex regulatory compliance data into clear visual narratives, reducing reporting turnaround time by 25%.
- Improved predictive model reliability for workforce trend forecasting by applying feature engineering and statistical analysis techniques to raw HR datasets, enabling data-informed recommendations on federal auditing risk and workforce satisfaction outcomes.
- Established data governance standards across HR reporting pipelines by maintaining structured documentation, validation protocols, and quality control procedures that ensured consistency and audit readiness across all analytical deliverables.

Deloitte (US Offices of India) Hyderabad, India

Consultant November 2021 - July 2024

- Drove analytics adoption for 200+ stakeholders across cross-functional teams by designing and delivering 50+ interactive Power BI and Tableau dashboards, translating complex business requirements into performance-aligned reporting solutions using DAX-based data models and semantic layer design.
- Increased operational throughput by 20% by automating recurring business workflows through Power Automate, reducing manual effort and strengthening data accuracy standards across client reporting pipelines.
- Accelerated time-to-insight for senior leadership by leading stakeholder alignment sessions that converted strategic objectives into scalable BI solutions, incorporating iterative feedback loops throughout an Agile delivery framework.
- Enhanced data governance and reporting reliability by building and maintaining Power Apps business applications with structured version control and audit-ready documentation, ensuring consistent outputs across all client engagements.

Cognizant Pune, India

Programmer Analyst July 2020 - October 2021

- Restored data availability for sales and operations teams within SLA windows by resolving complex Power BI access and reporting issues, reducing average resolution time by 25% through systematic root cause analysis and cross-functional collaboration.
- Ensured reporting consistency and data governance compliance across 10+ active datasets by managing scheduled refreshes and maintaining comprehensive documentation within Power BI Service, upholding data integrity standards across all business reporting functions.

EDUCATION

Michigan State University	East Lansing, MI
Master's Degree in Data Science GPA: 3.9	May 2026
SRM University	Chennai, India
Bachelor of Technology, Computer Science and Engineering GPA: 7.92/10	May 2020

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

Certifications: Microsoft Certified: Power BI Data Analyst Associate (PL-300) | Microsoft Certified: Power Platform Fundamentals | Google Data Analytics Certification

Relevant Coursework: Machine Learning, Statistical Modeling, Data Mining, Big Data Systems, Applied Regression Analysis

Tools and Platforms: Power BI Service Administration | Scikit-learn | PyTorch | TensorFlow | Snowflake | Google Cloud Platform
